SECTION 1: Identification of the substance/mixture

SECTION 1. IDENTIFICATION

Product name Clear Guard® First Seal™

Manufacturer or supplier's details
Company name of supplier Butterfield Color, Inc.
Address 625 W Illinois Ave
Aurora, IL 60506
Telephone (630) 906-1980
Emergency telephone CHEMTREC: (800) 424-9300 (USA)
CANUTEC (613-996-6666 (CANADA)

Recommended use of the chemical and restrictions on use
Recommended use Reactive penetrating sealer

SECTION 2: Hazards Identification

GHS Classification
Skin irritation Category 2
Eye irritation Category 2A

GHS Label element
Hazard pictograms

Signal Word Warning

Hazard Statements H315 Causes skin irritation.
H319 Causes serious eye irritation.

Precautionary Statements
P261 Avoid breathing spray.
P264 Wash skin thoroughly after handling.
P271 Use only outdoors or in a well-ventilated area.
P280 Wear protective gloves / protective clothing / face protection / eye protection.
P302 + P352 IF ON SKIN: Wash with plenty of soap and water.
P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P308 + P313 If skin irritation occurs: Get medical advice/ attention.
P337 + P313 If eye irritation persists: Get medical advice/ attention.
P362 + P364 Take off contaminated clothing and wash it before reuse.

Other hazards
None known.
SECTION 3: Composition Information on Ingredients

Substance / Mixture: Mixture
Chemical nature: Silicone emulsion

Hazardous ingredients

SECTION 4: First Aid Measures

General advice In the case of accident or if you feel unwell, seek medical advice immediately. When symptoms persist or in all cases of doubt seek medical advice.

If inhaled If inhaled, remove to fresh air. Get medical attention if symptoms occur.

In case of skin contact In case of contact, immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Get medical attention. Wash clothing before reuse. Thoroughly clean shoes before reuse.

In case of eye contact In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. If easy to do, remove contact lens, if worn. Get medical attention.

If swallowed If swallowed, DO NOT induce vomiting. Get medical attention if symptoms occur. Rinse mouth thoroughly with water.

Most important symptoms Causes skin irritation. Causes serious eye irritation.

Protection of first-aiders First Aid responders should pay attention to self-protection, and use the recommended personal protective equipment when the potential for exposure exists.

Notes to physician Treat symptomatically and supportively.

SECTION 5: Fire Fighting Measures

Suitable extinguishing media Water spray
Alcohol-resistant foam
Dry chemical
Carbon dioxide (CO2)

Unsuitable extinguishing media None known

Specific hazards during fire fighting Exposure to combustion products may be a hazard to health.
Clear Guard® First Seal™
Safety Data Sheet

Hazardous combustion products
- Carbon oxides
- Silicon oxides
- Formaldehyde

Specific extinguishing methods
- Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.
- Use water spray to cool unopened containers.
- Remove undamaged containers from fire area if it is safe to do so.
- Evacuate area.

Special protective equipment for fire-fighters
- In the event of fire, wear self-contained breathing apparatus.
- Use personal protective equipment.

SECTION 6: Accidental Release Measures

Personal precautions, protective equipment and emergency procedures
- Use personal protective equipment.
- Follow safe handling advice and personal protective equipment recommendations.

Environmental precautions
- Discharge into the environment must be avoided.
- Prevent further leakage or spillage if safe to do so.
- Prevent spreading over a wide area (e.g. by containment or oil barriers).
- Retain and dispose of contaminated wash water.
- Local authorities should be advised if significant spillages cannot be contained.

Methods and materials for containment and cleaning up
- Soak up with inert absorbent material.
- For large spills, provide diking or other appropriate containment to keep material from spreading. If diked material can be pumped, store recovered material in appropriate container.
- Clean up remaining materials from spill with suitable absorbent.
- Local or national regulations may apply to releases and disposal of this material, as well as those materials and items employed in the cleanup of releases. You will need to determine which regulations are applicable.
- Sections 13 and 15 of this SDS provide information regarding certain local or national requirements.

SECTION 7: Handling and Storage

Technical measures
- See Engineering measures under EXPOSURE CONTROLS/PERSONAL PROTECTION section.

Local/Total ventilation
- Use only with adequate ventilation.

Advice on safe handling
- Do not get on skin or clothing.
- Avoid inhalation of vapor or mist. Do not swallow.
- Do not get in eyes.
- Handle in accordance with good industrial hygiene and safety practice.
- Keep away from water. Protect from moisture.
- Take care to prevent spills, waste and minimize release to the environment.

Conditions for safe storage
- Keep in properly labeled containers.
- Store in accordance with the particular national regulations.

Materials to avoid
- Do not store with the following product types:
- Strong oxidizing agents
SECTION 8: Exposure Control

Ingredients with workplace control parameters
Contains no substances with occupational exposure limit values.

Hazardous components without workplace control parameters

</tbody>
</table>

Engineering measures
Processing may form hazardous compounds (see SECTION 10).
Ensure adequate ventilation, especially in confined areas.
Minimize workplace exposure concentrations.

Personal protective equipment

Respiratory protection
General and local exhaust ventilation is recommended to maintain vapor exposures below recommended limits. Where concentrations are above recommended limits or are unknown, appropriate respiratory protection should be worn. Follow OSHA respirator regulations (29 CFR 1910.134) and use NIOSH/MSHA approved respirators. Protection provided by air purifying respirators against exposure to any hazardous chemical is limited. Use a positive pressure air supplied respirator if there is any potential for uncontrolled release, exposure levels are unknown, or any other circumstance where air purifying respirators may not provide adequate protection.

Hand protection Material
Impervious gloves

Remarks
Choose gloves to protect hands against chemicals depending on the concentration specific to place of work. Breakthrough time is not determined for the product. Change gloves often! For special applications, we recommend clarifying the resistance to chemicals of the aforementioned protective gloves with the glove manufacturer. Wash hands before breaks and at the end of workday.

Eye protection
Wear the following personal protective equipment:
Safety goggles

Skin and body protection
Select appropriate protective clothing based on chemical resistance data and an assessment of the local exposure potential.
Skin contact must be avoided by using impervious protective clothing (gloves, aprons, boots, etc.).
Hygiene measures
Ensure that eye flushing systems and safety showers are located close to the working place. When using do not eat, drink or smoke. Wash contaminated clothing before re-use. These precautions are for room temperature handling. Use at elevated temperature or aerosol/spray applications may require added precautions. For further information regarding the use of silicones/organic oils in consumer aerosol applications, please refer to the guidance document regarding the use of these type of materials in consumer aerosol applications that has been developed by the silicone industry (www.SEHSC.com).

Clear Guard® First Seal™
Safety Data Sheet

Viscosity
Viscosity, dynamic  480 mPa.s

Explosive properties  Not explosive

Oxidizing properties  The substance or mixture is not classified as oxidizing.

Molecular weight  No data available

SECTION 10: Stability and Reactivity

Reactivity  Not classified as a reactivity hazard.
Chemical stability  Stable under normal conditions.
Possibility of hazardous reactions  Use at elevated temperatures may form highly hazardous compounds. Can react with strong oxidizing agents. Hazardous decomposition products will be formed upon contact with water or humid air. Hazardous decomposition products will be formed at elevated temperatures.
Conditions to avoid  Exposure to moisture.
Incompatible materials  Oxidizing agents
Water
Hazardous decomposition products
Contact with water or humid air  Ethanol
Thermal decomposition  Formaldehyde

SECTION 11: Toxicological Information

Information on likely routes of exposure
Inhalation
Skin contact
Ingestion
Eye contact

Acute toxicity
Not classified based on available information.

Product:
Acute oral toxicity  Acute toxicity estimate: > 5,000 mg/kg
Method: Calculation method
Clear Guard® First Seal™
Safety Data Sheet

Ingredients:
Triethoxyoctylsilane:
Acute oral toxicity: LD50 (Rat): > 5,110 mg/kg
Assessment: The substance or mixture has no acute oral toxicity

Acute dermal toxicity: LD50 (Rat): > 6,730 mg/kg
Assessment: The substance or mixture has no acute dermal toxicity
Remarks: Based on test data

Ethoxylated lauryl alcohol:
Acute oral toxicity: LD50 (Rat): > 2,000 mg/kg
Remarks: Based on data from similar materials

Acute inhalation toxicity: LD50 (Rat): > 1.6 mg/l
Exposure time: 4 h
Test atmosphere: dust/mist
Remarks: Based on data from similar materials

Acute dermal toxicity: LOSO (Rat): > 2,000 mg/kg
Remarks: Based on data from similar materials

Skin corrosion/irritation
Causes skin irritation.

Ingredients:
Triethoxyoctylsilane:
Species: Rabbit
Result: Skin irritation
Remarks: Based on test data

Ethoxylated lauryl alcohol:
Result: No skin irritation
Remarks: Based on data from similar materials

Serious eye damage/eye irritation
Causes serious eye irritation.

Ingredients:
Triethoxyoctylsilane:
Species: Rabbit
Result: No eye irritation
Remarks: Based on test data

Ethoxylated lauryl alcohol:
Result: Irreversible effects on the eye
Remarks: Based on data from similar materials

Respiratory or skin sensitization
Skin sensitization: Not classified based on available information.
Respiratory sensitization: Not classified based on available information.
Ingredients:

Ethoxylated lauryl alcohol:
Test Type: Maximization Test (GPMT)
Routes of exposure: Skin contact
Species: Guinea pig
Result: negative
Remarks: Based on data from similar materials

Germ cell mutagenicity
Not classified based on available information.

Ingredients:

Triethoxyoctylsilane:
Genotoxicity in vitro
Test Type: Mutagenicity (in vitro mammalian cytogenetic test)
Result: negative
Remarks: Based on test data

Ethoxylated lauryl alcohol:
Genotoxicity in vitro
Test Type: Bacterial reverse mutation assay (AMES)
Method: OECD Test Guideline 471
Result: negative

Carcinogenicity
Not classified based on available information.

IARC
No ingredient of this product present at levels greater than or equal to 0.1% is identified as probable, possible or confirmed human carcinogen by IARC.

OSHA
No ingredient of this product present at levels greater than or equal to 0.1% is identified as a carcinogen or potential carcinogen by OSHA.

NTP
No ingredient of this product present at levels greater than or equal to 0.1% is identified as a known or anticipated carcinogen by NTP.

Reproductive toxicity
Not classified based on available information.

Ingredients:

Triethoxyoctylsilane:
Effects on fertility
Test Type: Combined repeated dose toxicity study with the reproduction/developmental toxicity screening test
Species: Rat, male and female
Application Route: Ingestion
Symptoms: No effects on fertility
Remarks: Based on test data

Effects on fetal development
Test Type: Combined repeated dose toxicity study with the reproduction/developmental toxicity screening test
Species: Rat, male and female
Application Route: Ingestion
Symptoms: No effects on fetal development
Remarks: Based on test data
Reproductive toxicity

Assessment: No evidence of adverse effects on sexual function and fertility, or on development, based on animal experiments.

STOT-single exposure
Not classified based on available information.

STOT-repeated exposure
Not classified based on available information.

Ingredients:

Triethoxyctylosilane:
Routes of exposure: Ingestion
Assessment: No significant health effects observed in animals at concentrations of 100 mg/kg bw or less.

Repeated dose toxicity

Ingredients:

Triethoxyctylosilane:
Species: Rat
Application Route: Ingestion
Remarks: Based on test data

Ethoxylated lauryl alcohol:
Species: Rat
NOAEL: >= 100 mg/kg
Application Route: Ingestion Exposure time: 90 d
Method: OECD Test Guideline 408
Remarks: Based on data from similar materials

Aspiration toxicity
Not classified based on available information.

Further information

Ingredients:

Triethoxyctylosilane:
Remarks: Findings from a combined repeated-dose toxicity study with reproductive/developmental screening endpoints on n-octyltriethoxysilane have shown neurological effects in rats at high doses (1000 mg/kg). Paralysis and paresis of the limbs, and demyelination of the brain, spinal cord, sciatic and tibial nerves was noted in some animals.
SECTION 12: Ecological Information

Ecotoxicity

Ingredients:

Triethoxyoctylsilane:
Toxicity to daphnia and other aquatic invertebrates
EC50 (Daphnia sp.): > 0.049 mg/l
Exposure time: 48 h
Method: OECD Test Guideline 202
Remarks: No toxicity at the limit of solubility

Toxicity to algae
ErC50 (Pseudokirchneriella subcapitata (green algae)):
> 0.13 mg/l
Exposure time: 72 h
Method: OECD Test Guideline 201
Remarks: No toxicity at the limit of solubility

Ethoxylated lauryl alcohol:
Toxicity to fish
LC50 (Danio rerio (zebra fish)): > 1 - 10 mg/l
Exposure time: 96 h

Toxicity to daphnia and other aquatic invertebrates
EC50 (Daphnia magna (Water flea)): > 1 - 10 mg/l
Exposure time: 48 h
Remarks: Based on data from similar materials

Toxicity to algae
EC50 (Pseudokirchneriella subcapitata (green algae)):
> 0.1 - 1 mg/l
Exposure time: 72 h
Remarks: Based on data from similar materials

NOEC (Pseudokirchneriella subcapitata (green algae)):
> 0.1 - 1 mg/l
Exposure time: 72 h
Remarks: Based on data from similar materials

M-Factor (Acute aquatic toxicity)
1

Toxicity to fish (Chronic toxicity)
NOEC (Lepomis macrochirus (Bluegill sunfish)): > 0.1 - 1 mg/l
Exposure time: 30 d
Remarks: Based on data from similar materials

Toxicity to daphnia and other aquatic invertebrates (Chronic toxicity)
NO50 (Daphnia magna (Water flea)): > 0.1 - 1 mg/l
Exposure time: 21 d
Remarks: Based on data from similar materials

Persistence and degradability

Ingredients:

Triethoxyoctylsilane:
Biodegradability
Result: Not readily biodegradable.
Biodegradation: 31.5 %
Method: OECD Test Guideline 301D
Remarks: Based on test data

Ethoxylated lauryl alcohol:
Biodegradability
Result: rapidly degradable
Remarks: Based on data from similar materials
Bioaccumulative potential

Ingredients:

Triethoxyoctylsilane:
Partition coefficient: log Pow: 6.41
n-octanol/water Method: OECD Test Guideline 117

Ethoxylated lauryl alcohol:
Bioaccumulation Bioconcentration factor (BCF): < 500
Remarks: Based on data from similar materials

Mobility in soil
No data available

Other adverse effects
No data available

SECTION 13: Disposal Considerations

Disposal methods
Resource Conservation and Recovery Act (RCRA)
This product has been evaluated for RCRA characteristics and does not meet the criteria of hazardous waste if discarded in its purchased form

Waste from residues Dispose of in accordance with local regulations

Contaminated packaging Dispose of as unused product
Empty containers should be taken to an approved waste handling site for recycling or disposal

SECTION 14: Transportation Information

International Regulation

UNRTDG
Not regulated as a dangerous good

IATA-DGR
Not regulated as a dangerous good

IMDG-Code
Not regulated as a dangerous good

Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code
Not applicable for product as supplied.

Domestic regulation

49 CFR
Not regulated as a dangerous good
# SECTION 15: Regulatory Information

Sources of key data used to compile the Safety Data Sheet

Issue Date
6/14/2017

The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and shall not be considered a warranty or quality specification of any type. The information provided relates only to the specific material identified at the top of this SDS and may not be valid when the SDS material is used in combination with any other materials or in any process, unless specified in the text. Material users should review the information and recommendations in the specific context of their intended manner of handling, use, processing and storage, including an assessment of the appropriateness of the SDS material in the user’s end product, if applicable.
